

Please do not change current regulations so as to allow greater concentration of media control. As it is, the media in this country has lost a great deal of its ability to report the truth and live up to the standards of a vigorous and free press because of the current entertainment focus brought about by the profit maximizing philosophies of the few media conglomerates that own most of our media. Television news has given up reporting serious news. Most of us rely on the Internet and foreign news sources for real news. Allowing further concentration of media control will severely harm citizens' ability to be informed, and thus to participate in a true democracy.
